***Allowable Subject Matter***

1. Claims 1-8 and 17-19 are allowed. The claims are renumbered 1-11 respectively.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or adequately suggest each and every element of the claimed invention.

Independent claim 1 recites *a method for controlling play speed in an optical disc device, the method include (a) reading data from an optical disc, (b) determining whether or not the reading in step (a) is a sequential reading operation, (c) lowering a data read speed of the optical disc if the data reading has failed, when the step (b) determines that the data reading is a sequential reading operation, and (d) selectively varying a current play speed based on the results of step (b), when the step (b) determines that the data reading is not a sequential reading operation.*

The combination of Tomishima in view of Youn, see Non-Final Rejection dated May 5, 2008, does not adequately teach or suggest steps (b), (c), and (d). Tomishima teaches a sequential reading operation, but Youn teaches varying the speed in reading and reproduction according to a transmission rate or residual amount of stored data. Independent claim 17 recites similar features in a varying scope and is thus allowed for the same reasons above.

For these reasons, claims 1-8 and 17-19 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
